Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

1. Receipt is acknowledged of response dated 3/31/2003, which has been placed in the file of record, and to which this action is a reply.

REASONS FOR ALLOWANCE

2. Claims 1-21 are allowed. The following is a statement of the examiner's reasons for allowance.

3. Re claims 1-12 and 21: The nearest available prior art of record, Tycko (US 5,194,909), shows (column 7, line 66; column 4, lines 65-70) the spherizing of red blood samples using spherizing reagent. The solution is (column 8, lines 8-15) a neutrally buffered saline solution (7.4 pH). Individual cells are 'entrained' (column 5, line 4). There is a 'stream' (column 15, line 51) of liquid containing the cells. Light of a particular color is shone on the cells (column 5, line 9; column 9, line 41). Tycko further shows that scattering measurements are taken at two particular angles (figures 4 and 5). These are 'forward scattering' measurements (column 5, lines 10-12). Tycko does show the use of plots to correlate the three variables of volume (V), HC and a scatter signal in figures 4 and 5, although he only shows this in two dimensions. However, in doing so, Tycko illustrates the principle of using gridded lines in a third variable to include 3 variables in 2 dimensions. Tycko also shows that a given measurement of scattering at a certain angle forms a single 'equation' for the variables of volume V and hemoglobin concentration HC (see figures 4 and 5). In figures 4 and 5, Tycko effectively shows two such equations.

Art Unit: 2876

Tycko notably fails to teach or suggest “projecting a three-dimensional coordinate of light scatter signals from each cell onto a three-dimensional surface containing grid lines of V and HC.”

Nowhere else does the prior art of record teach or suggest the 3-dimensional analytical techniques claimed by the applicant for using a variety of scatter signals to obtain measurements of hemoglobin concentration and blood volume.

4. Re claims 13-20: The applicant’s arguments regarding claim 13 in the action of 3/31/2003 were persuasive. The examiner agrees that certain elements taught in the prior art were lacking in Tycko as modified by Altendorf as applied to claim 13 of the previous action.

In particular, Tycko doesn’t employ the same type of multi-angle light scattering as in the claimed invention. Further, as the applicant points out, large angle scattered light photo detectors are employed in Altendorf, and these are explicitly for Altendorf’s white blood cell analysis. They are not designed to be dual-use.

The examiner did not find indication elsewhere in the prior art of record of teachings of the full limitations of claim 13.
